Education

Indian Institute of Technology Mandi M.Tech(R) *Intelligent Systems* **9.47/10.0** — Feb 2023- Jun 2025
Shiv Nadar University, B.Tech in Electronics & **Minor**: Design | 7.61/10.0 — Jul 2015 - May 2019
Delhi Public School Ghaziabad, 12th | PCM 92.4% 10th | (Science) | 10 CGPA — 2013 - 2015

Experience

Research Engineer 2, *Attentive.AI*– Gurgaon, IN *(Physical)* current — Jun 2025 - Present

- Built, trained, benchmarked, evaluated, and deployed deep learning methods for Symbol Search, Vector Paths annotation (.svg), HVAC-elements annotations and Image (.png/.jpeg) from complex PDF documents containing architectural diagrams. ***[Document Data]***
- Increased class-wise accuracy by 7% on state-of-art segmentation models for CAD drawings with a tokenization approach to pretrain on vector paths.
- Cascaded and multi-OCR per-page call design to have fast and robust text callout extraction from CAD drawings.

Researcher, *IIT Mandi*– Mandi, IN *(Physical)* — Feb 2023 - Jun 2025

- Primary research in building *foundational* models for *Medical* and *3D Point Cloud* data using unsupervised, reinforcement and supervised learning, achieving SOTA results globally for WM Tract Segmentation
- Architected and deployed an end-to-end open-source deep learning pipeline on 3D Slicer, for inferring our streamline tracking, segmentation and reconstruction models locally (GPUs at hospitals)
- **Outperformed** results from Harvard Medical School and SCIL, Canada. **Published 5** research papers at leading international AI and Medical conferences, ICPR'24 (TractoEmbed, TractRL-former), ISBI'25 (TractoGPT), ISBI'26 (TrackletGPT, TractRLFusion).

Lead Data Scientist, *StatusNeo*– Gurgaon, IN *(Hybrid)* — Aug 2022 - Mar 2023

- Led the Cortex AI Team for **Reliance Jio** (client) which was part of BrainOS project, an AI system which spans across Jio's Verticals. With a focus to make a learning framework, agnostic of libraries like scikit-learn, pytorch, tensorflow by defining schemas of algorithms in *protobufs* and *ONNX* . ***[Multimodal Data]***

Senior Data Scientist, *Gamezop* – Gurgaon, IN *(Remote)* — Jun 2021 – Jun 2022

- Led the Deposit Prediction Project (**ClickVision**), where using *Reinforcement Learning* we predicted "cash deposit" event within 5 mins of the sign-up user, minimising churn, show ads to prospective users. ***[Web]***
- Resulted in reduction of wasted offers and churning users by an average of 60%, improving conversion rates to deposits. As a ripple-effect UI changes were made to streamline the user trajectory to the target event.

Founder & CEO, *Tensr.AI* – Noida, IN *(Remote)* — Feb 2020 - Jun 2021

- Modelling of valvular malfunctions (mitral and tricuspid valves), and blood regurgitation using *Simulink* on *MATLAB*. Algorithms (**pyCardiogram**) to perform wave annotations to find correlations among different biomedical signals ECG, PPG and SCG. Used *LSTM*, *RNNs* and *Neurokit* on *Biomedical Signals*. ***[Signal]***
- Designing, prototyping, and building our proprietary device, Teresa Band, to capture the biomedical signals. Scaled up to a team of 15 members, raised 4 gov. grants, DST DPIIT certified. Incubated and funded by SIIC IIT Kanpur, IIT Madras, and IIT Mandi. Ranked **3** in HST

Data Scientist, *xtLytics LLC* Noida, IN *(Physical)* — Jan 2019 - Jan 2020

- **CADtnet**: Developed an edge-based AI app (**TFlite**) and deep learning model using VGG 19, MobileNet, and ResNet for the Low Middle Income Countries to Triage Breast Cancer using Ultrasound Images by clicking photos of the Ultrasound scans. | **Invoice OCR** using GCP, Tesseract, Faster-RCNN which extracts and maps content in Tables (from images of tables) to a desired .csv, .xlsx format. ***[Image Data]***

Tech Stack, Skills and Certifications

Languages: *Python*, MATLAB, C, C#, ProtoBuf, LateX || **Certifications:** **DL Specialization** [WXBN3CDY3J33]
Tools in DL: PyTorch, Numpy, Pandas, Keras, Tensorflow, scikit-learn, ONNX, scipy, wfdb, SpaCy, Tensorboard, ollama, Unity ML Agents, FB Prophet, neurokit, NLTK, Spark, Open3D, OpenCV, HuggingFace, GeoPandas
For *LLMs* : LangChain, LangGraph, *Neo4j, Memgraph*, Microsoft AutoGen, DSPy, RAG, GraphRAG, LLMs, Multimodal LLMs (3D, Text, Image), AWS , GCP, Unity, Power BI
Methods: 3D and 2D Computer Vision, Point Cloud Editing, Transformers, Deep Reinforcement Learning, Knowledge Graphs, NLP, ML, Tokenization in Multimodal LLMs (MLLMs), Representation Learning
***Others*:** Simulink, Illustrator, Verilog, 3D Slicer, MRtrix3, FSL, FreeSurfer, NeuroDesk,
